This was so well done, and it hit me in the feels. The spooky was enough it put my sister and I on edge (we played together), but the story was captivating. The story is a gut punch for our feels and if you love yourself you will play this with a tub of ice cream, some fluffy blankets and your favorite cuddle\/sit\/cry friend on your side. I would have been willing to pay probably $10\/15 for this game and still been satisfied. The fact I got it on steam sale for $1 feels like a steal. Just check it out.. Stray Cat Crossing is an indie pixel horror game set in a surreal eerie world filled with all kind of strange creatures. This is a great spooky puzzle game if you're looking for something pleasing to the eye and at the same time packed with interesting puzzles and a touching story.

- Beautiful pixel art. Reminds me plenty of something from Studio Ghibli.
- Very nice soundtrack.
- Handful of puzzles and riddles throughout the whole game.
- Mystery!
- THE FEELS.
- It's very short... Would be great if it was even longer.

Overall it's good for a short horror game, especially for this price.. This game is full of little design choices that seem to have been made for no reason other than padding out the minimum playthrough time.

However, I think the real problem with this game is that it feels like a prototype for a much better game.

If the developer makes another game, I might buy it, but I wouldn't recommend this one unless you want to try a weird experimental game that doesn't quite work.
